

PS3301 POWER STROKE HONES

FEATURES

- Handles automotive V6, V8, and inline blocks up to 42" long.
- 1HP gear reduction drive motor and friction feed hone head - allows the operator to remove stock fast.
- Ampmeter allows the operator to maintain straight round cylinders without stopping to gauge.
- Stroke speed control knob and air/oil stroke system give operator a smooth consistent crosshatch angle that is infinitely variable.
- Positive bottom stop is adjustable and prevents hone head from hitting main webs.
- Up front carriage traverse handle allows operator to quickly and easily position hone head over cylinder.
- Convenient rollover handle for easy precise leveling of block at any cylinder angle.
- Honing oil filter system ensures clean oil and consistent surface finish.
- Convenient dwell button on front control panel allows operator to dwell hone head anywhere in cylinder.
