

## THERMAL CLEANING SYSTEMS

### OVEN

First, our rotisserie style **oven** uses a controlled burn cycle for even heating with no hot spots. The balanced-burn tube design makes this the fastest and even oven on the market

CUSTOM  
ENGINEERED  
SOLUTIONS!

### BLASTER & DUST COLLECTOR

Next, the **shot blaster** uses a full-length, single-impeller motor to ensure the most consistent cleaning to bare metal and eliminating the extra manual labor.

CUTS TOTAL  
CLEANING TIME  
IN HALF!

### SHAKER

Finally, the **STC** removes shot and cools the parts with a powerful blower and high CFM movement.

- Step 1: Fast Bake
- Step 2: Polish Blast
- Step 3: Shake, Tumble, Cool
