

PAX300 AGITATION WASHER

FEATURES

- AISI 316 stainless-steel inside tank material
- PLC Controls
- Pneumatic cylinders
- 0 - 40 minute cycle
- 68°F - 140°F range
- Digital temperature control
- 24V DC controls
- 100 PSI required air pressure
- Fast or slow agitation speed
- 2HP circulation pump
- 500 micron filter

OPTIONS

- Cover lift system

Model	Details
Loading Capacity	1,760 lbs.
Platform	43" x 27"
Solution Volume	317 gal.
Solution Depth	35"
Electric	440V/3PH/60HZ
Circulation Pump	2HP
Platform Movement	19.6"
Electric Heating System	48KW

The PAX300 is designed for the removal of oils, chips, and particulate from a wide variety of components with water based detergents and/or environmentally safe solvents.

Ideal for the transportation, metalworking, printing, and reconditioning industry.
